Our Vision

A top-three cockpit electronics player delivering a rich, connected cockpit experience for every car from luxury to entry

SOFTWARE ENGINEER – SOFIA, BULGARIA

Primary Responsibilities

As a software engineer you will be working as part of our HMI team in Sofia, alongside fellow engineers – working with the very latest cutting edge technologies, including C++ and computer graphics. You will design and develop software to implement and integrate the latest HMI software components for our state-of-the-art automotive instrument clusters and driver information displays.

Typical Duties

- Analyze customer requirements
- Create software architecture
- Take part in task estimation
- Implement and integrate software components
- Coach team members to increase efficiency
- Optimize code
- Perform component and integration tests

Desired Competencies/Experience

- Experience developing embedded and/or application software in C and C++; Java or UNIX
- Very good English
- Good interpersonal skills
- Experience with operating systems like Linux, QNX or similar
- Experience with OpenGL ES 2.0 / OpenVG
- Experience with EB Guide Studio or any other embedded HMI toolchain
- Experience working with visual programming environments considered an advantage

Benefits

- Possibilities for career development in international company
- Professional development based on up-to-date training opportunities and expertise
- Competitive remuneration package with pool of benefits and incentives
- Open and friendly working atmosphere
- Social activities
