

## Luke Lu

### Vice President and Managing Director, China

As vice president and managing director for Visteon in China, Luke Lu has overall responsibility for the company's extensive cockpit electronics business in China, its largest market. Lu joined Visteon on March 1, 2017, and is based in Shanghai.

Lu has more than 23 years of experience in the automotive industry, including extensive experience setting up and managing joint ventures. He has held leadership positions with global companies including Johnson Controls, where he served as vice president, power solutions, Asia Pacific, and Exide Technologies, where he was president, Asia Pacific.

Before joining Visteon, Lu was president of Greater China at Axalta Coating Systems, where he had complete profit-and-loss responsibility. He previously worked at General Electric Corp. as Greater China marketing and application development manager for GE Silicones. Additionally he was a project manager at Pragmatics, Inc., a leading provider of software and systems engineering and other services to both defense and civilian agencies.

Lu is a graduate of Nankai University with a bachelor's degree in physical chemistry. He also holds a doctorate degree in inorganic and physical chemistry from Georgetown University.
