Our Vision

A top-three cockpit electronics player delivering a rich, connected cockpit experience for every car from luxury to entry

LEAD SOFTWARE ENGINEER (TECHNICAL DELIVERY MANAGER) – SOFIA, BULGARIA

Primary Responsibilities

The lead software engineer will manage an engineering project team who focus on quality and continuous improvement to meet the needs of the customer. Our HMI team works with the latest cutting-edge technologies to implement and integrate HMI software components for our state-of-the-art automotive instrument clusters and driver information displays – the person in this role will be in charge of leading that team at our office in Sofia, Bulgaria.

Typical Duties

- Manage customer project – resources, timing and budget
- Lead a team of software engineers
- Develop strong relationships with customers to meet a high degree of customer satisfaction
- Secure quality of deliverables

Desired Competencies/Experience

- University degree in computer science or equivalent
- Minimum five years in developing embedded and/or application software in C and C++; Java, UNIX shell scripting
- Sound experience leading and managing a team
- Experienced using modern software development processes, including software configuration management tools, defect tracking tools and peer review and software version control
- Working experience with applying Scrum or other Agile methodology
- Excellent English verbal and written communication skills
- Working experience in HMI and/or POSIX OS applications development will be considered an advantage
