Visteon is an equal opportunity employer committed to a culturally diverse workforce.

### Our Vision

A top-three cockpit electronics player delivering a rich, connected cockpit experience for every car from luxury to entry

## SENIOR SOFTWARE DEVELOPER – SOFIA, BULGARIA

### Primary Responsibilities

The senior software developer will be working in our HMI team in Sofia, alongside fellow software developers – working with the latest cutting-edge technologies to develop software and implement and integrate the latest HMI software components for state-of-the-art vehicle instrument clusters and driver information displays. In addition, the senior software developer will be responsible for mentoring junior developers within the team.

### Typical Duties

- Analyze customer requirements
- Create software architecture
- Take part in task estimation
- Implement and integrate software components
- Coach team members to increase efficiency
- Optimize code
- Perform component and integration tests

### **Desired Competencies/Experience**

- Experience in programming language C or C++
- Professional experience in design of software for embedded systems will be considered an advantage
- Very good English skills. It is an advantage for you to have knowledge of German.
- Good interpersonal skills
- Some experience leading or mentoring others considered an advantage
- Experience with operating systems like Linux, QNX or similar
- Experience with OpenGL ES 2.0 / OpenVG
- Experience with EB Guide Studio or any other embedded HMI toolchain
- Experience working with visual programming environments will be considered an advantage

### **Benefits:**

- Possibilities for career development in international company
- Professional development based on up-to-date training opportunities and expertise
- Competitive remuneration package with pool of benefits and incentives
- Open and friendly working atmosphere
- Social activities
