SUPPLIER PERFORMANCE ENGINEER – SHANGHAI, CHINA

Primary Responsibilities

Support new supplier's assessment in Asia region.

Typical Duties

- Support purchasing by doing site assessments for new suppliers or new locations
- Follow up the supplier action plans and give suggestions to sourcing team
- Introduce company-specific requirements and applications such as supplier portal, supplier PPAP submission, supplier change request, supplier report card, etc.
- Support program developing through following up with the supplier's APQP process, to ensure products can be launched flawlessly and on time
- Review PPAP documents or process on site if required and approve the PPAP according to Visteon procedures
- Coordinate with global plants and suppliers to solve quality issues and follow up the supplier's actions to prevent the reoccurrence through conference call, net meeting or on site review
- Plan and execute the supplier improvement plan for critical suppliers from the previous year to secure Visteon plant production and secure customers
- Support purchasing annual supplier business review

- Lead coordination of status and issues with program manager and purchasing. Summarize status and develop internal and customer level reports as needed.
- Other duties assigned by management

Requirements

Years of Experience:

- At least five years working experience with manufacturing and quality and three years in the automotive industry
- One year of experience with supplier management
- At least five years of display industry experience including process engineer/ quality engineer in display assemble process, ESD control, environment particles control, etc.

Degree Strongly Preferred: Bachelor's degree or higher in the engineering field

Desired Competencies/Experience

- Understand the key elements of ISO/TS 16949
- Fully understand AIAG technical manuals (APQP and CP, FMEA, MSA, SPC, PPAP)
- Experience with quality problem analyzing and solving tools such as 8D, 5 Whys, Six Sigma, etc.
- Excellent communication skills both internally and externally
- Good communication skills in both spoken and written English with the ability to effectively communicate in e-mail and conference calls
- Good at utilizing Microsoft Office applications
- Capable and willing to lead supplier to do the improvement
- Able to lead cross functional problem solving team
- Self-motivated and responsible
