### Our Vision

A top-three cockpit electronics player delivering a rich, connected cockpit experience for every car from luxury to entry

## TECHNICAL PROJECT MANAGER – KARLSRUHE, GERMANY

### Primary Responsibilities

Responsible for the coordination of property development projects (reference designs, proof-of-concept and demonstrators) within the driver information product group. Work with centers of competence (CoCs), customer regional engineering (CREs), suppliers and partners setting and running project teams (goal, cost and timing).

### Typical Duties

- **Project goals and objectives, budget plan, timing management**
  - Key point of contact for technical project management for driver information product management group
  - Leads the definition of each individual project working collaboratively with product managers and CoC leadership
  - Maintains master project schedules, spending budget and resource allocation

- Project technical kick-off and ongoing progress tracking
- Leads procurement activities, including but not restricted to purchase orders and delivery status
- Coordinates prototype build process, including technical and quality assessment
- **Process support and documentation**
  - Leads preparation of project approval submission and ongoing progress tracking, within the Visteon CDP process
  - Ensures that projects are documented (goals, requirements, drawings and specifications) and book shelved upon completion
  - Leads preparation for gate approval process milestones as per CDP 3
  - Leads, as required, preparation and execution of technical design reviews for each project

### Requirements

#### Academic experience to include:

- Master's degree in an engineering discipline

#### Professional experience to include:

- Minimum of 10 years in automotive/software/electronic industries
- Minimum of five years in project management roles (preference in customer projects)
- Minimum of three years in driver information products

#### Professional Competencies/Experience

- Thinks analytically; simplifies complex issues to identify the essence of a situation
- General understanding of the technology elements and system complexity
- Understands and leverages a multi-cultural business environment; works across the global organization to establish relationships and gain trust
- Decisive; grasps concepts quickly and achieves results in an ambiguous and changing environment
- Thinks strategically; evaluates the future's impact on today's decisions
