

## Visteon VPN Node FQDNs and IPs

This document is applicable only for Visteon Partners

To access Visteon VPN from Partner's network (LAN) using FortiClient, following Fully Qualified Domain Names (FQDNs) and IP Addresses need to be whitelisted in Partner's firewall or security setup:

| Region       | FQDN                       | IP Address       | Port |
|--------------|----------------------------|------------------|------|
| Americas     | glcc.vpn.visteon.com       | 74.112.167.150   | 443  |
| China        | china.vpn.visteon.com      | 43.254.228.77    | 443  |
| Asia Pacific | vtcchennai.vpn.visteon.com | 91.212.132.15    | 443  |
| Europe       | karlsruhe.vpn.visteon.com  | 202.0.77.15      | 443  |
| Global       | remote.visteon.com         | All of the above | 443  |
